No. 715M.—The 13th February 1903.—It is hereby notified for general information that, in supersession of the rules prescribed under Government Circular No. 36M., dated 31st August 1894, and Government Notification No. 636T.—M., dated the 3rd October 1895, the Lieutenant-Governor has been pleased to make the following rules for the preparation, submission, and execution of projects for water-supply or drainage by local authorities under section 69, sub-sections (*i*) and (*ii*) of the Bengal Municipal Act, 1884, as amended up to date, and section 138, sub-sections (*e*) and (*m*) of the Bengal Local Self-Government Act, 1885 :—

1. When a local authority desire to undertake a project for water-supply or drainage, they should, in the first place, take measures to draw up a sketch of the project, showing how it is to be carried out and what will be, roughly speaking, the approximate cost.

2. As regards the preliminary surveys required for the preparation of any project of water-supply or drainage, the local authority may either make their own arrangements for the employment of the necessary surveying staff, subject to the approval of the Sanitary Engineer, or may apply to the Sanitary Engineer to procure for them competent persons specially for the work. The Sanitary Engineer cannot himself ordinarily perform the work of making rough surveys, but he will act as the adviser of the local authority, and will, as far as practicable, engage surveyors for them if they desire it, and will, if instruments are available, lend them to local authorities on payment of the prescribed fee. If any maps of surveys are prepared in the Sanitary Board's office, a fee will be charged, fixed so as to cover, on an average, the actual expenses incurred.

NOTE.—The Sanitary Board have several sets of surveying instruments, which are available on loan to municipalities at the following rates per mensem :—

(1) Rupees seven for a level and two staves.
(2) Rupees three for a prismatic compass.
(3) Rupee one for a chain.

3. When a sketch project has been drawn up, an application must be addressed to the Municipal Department of Government, accompanied by a statement of the approximate cost, and the funds available for meeting it, either from current revenue or by way of loan.

4. The proposal will be considered by the Municipal Department, and administrative sanction will be given if the Government is satisfied—

First—That the work projected is really required, and that the advantage to health, which it is expected to ensure, is commensurate with the probable cost.

Second—That the scheme is financially sound, *i.e.*, that the local authority can meet the cost from revenue or can arrange to repay the loan within 30 years at the prescribed rate of interest.

Third—That it is sound from an engineering point of view, *i.e.*, that the work can be done effectually in the manner and for the cost proposed.

5. The Sanitary Board will be consulted (if any doubt exists) on the first and third points before approval is given; and if the rough or approximate estimate has not been furnished by the Sanitary Engineer, it will be checked by that officer.

6. When administrative sanction has been given, and in no case before, the local authority may arrange for the preparation of detailed plans and estimates, and in doing this may follow one or other of the following courses :—

(*a*) the plans and estimates may be prepared by their own officers;
(*b*) application may be made to the Sanitary Engineer for assistance in the selection of competent surveyors to carry out the work;
(*c*) application may be made to the Sanitary Board for the services of the Sanitary Engineer;
(*d*) application may be made to the officers of the Public Works Department employed in the district or division for assistance and advice;
(*e*) with the previous sanction of the Sanitary Board, the work may be entrusted to a private firm of established reputation.

In cases (*a*), (*b*), and (*c*) the Sanitary Engineer or other officer appointed for the purpose may, with the sanction of the Sanitary Board, be required to examine and criticise the plans and estimates while in course of preparation.

In case (*c*), if funds are available, the Sanitary Engineer, with the sanction of the Sanitary Board, may be required to draw up the detailed plans and estimates of the schemes.

7. When the plans and estimates have been completed, they will be forwarded in duplicate to the Sanitary Board with a full report on the financial aspects of the scheme, and state of public feeling in regard to it, and, if a loan is needed, with an application in the prescribed form. The Sanitary Board will then submit the plans, report, and application to the Municipal Department, with an expression of their opinion on the merits of the scheme as finally drawn up.

8. The following fees are leviable by the Sanitary Board from local bodies for the works specified below:—

(*a*) Two per cent. on the estimated cost of all drainage and water-works schemes for which detailed estimates and drawings are prepared.

This charge does not include the cost of survey, but is solely on account of work done in the Board's office.

(*b*) One-half per cent. on the first Rs. 20,000, and one-quarter per cent. on the balance of the estimated cost, when only approximate estimates are prepared and no drawings are required.

This charge will apply when estimates furnished by municipalities are checked and examined. In the event of detailed plans and estimates being subsequently supplied, the full charge under (*a*) will be made in addition.

(*c*) Rupees five for all tracings (double elephant size) of surveys and levels or sections.

(*d*) Rupees three for tracings of all drawings, such as a bridge or culvert, etc.

9. In the case of works estimated to cost Rs. 10,000 or more, the sanction of Government will be contingent on adequate provision being made for detailed engineering supervision. In the absence of special sanction to the contrary, the local authority must agree to such one of the following conditions as may be considered suitable in each case:—

(*a*) that the works shall be carried out by the Public Works Department if that Department can undertake them. In such cases an extra charge of 15 per cent. on the sanctioned estimate will be made for supervision, unless the case is one of extraordinary difficulty, in which case a higher charge may be imposed by the orders of Government; or

(*b*) that arrangements shall be made with the District Board for the work to be carried out by the District Engineer and his staff; or

(*c*) that the works shall be carried out under the supervision of an Engineer specially employed for the purpose, who must hold a certificate of qualification as a District Engineer according to the rules under the Bengal Local Self-Government Act, III of 1885;

(*d*) that the works shall be carried out by a private engineering firm of established reputation, subject to the conditions—

(1) that no contract for the execution of the work shall be entered into by the local authority until all the tenders received for the work have been considered by the Sanitary Board, and until the deed of contract with all documents attached thereto has been approved by the Board; and

(2) that the works while in progress shall be periodically inspected by the Sanitary Engineer or other officer appointed for the purpose.

10. In the case of works costing less than Rs. 10,000, the local authority should report, for the information of the Commissioner of the Division, the agency by which they propose to have the works carried out, and should follow the instructions issued by him in the matter.
